Monthly dairy exports and imports

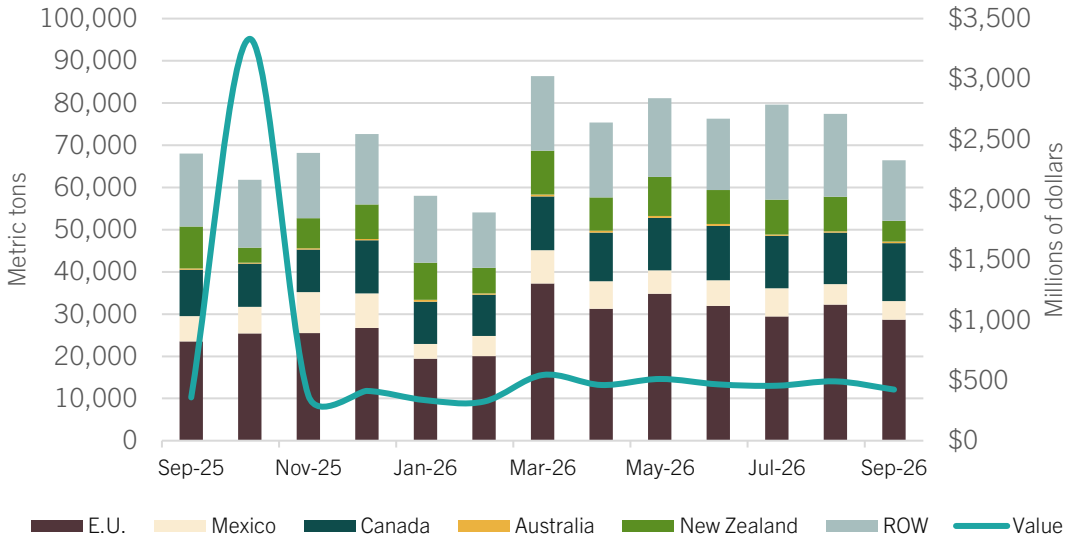

The charts below highlight the latest monthly trade flow data for the top five trading partners and the rest of the world. In 2025, dairy exports measured on a milk solids basis increased 4% year over year, driven by strong growth in protein exports. Butterfat recorded the largest gain, rising 163% compared with the previous year. U.S. cheese exports increased 20% year over year in 2025.
